Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

- 1) The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "24" and "31" have both been used to designate a light receiving element in figure 7. Correction is required.

- 2) The disclosure is objected to because of the following informalities: On page 12, line 9, "permits" should be permit.

Appropriate correction is required.

Claim Objections

- 3) Claims 10 – 14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not serve as a basis for any other multiple dependent claim, either directly or indirectly. See MPEP § 608.01(n). Accordingly, the claims 12 – 14 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

- 4) The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 5) Claims 1 – 9 and 15 – 16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one

Art Unit: 2815

skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It would not have been clear to one of ordinary skill in the art, based on either the disclosure or the claims as originally filed, at the time the present invention was made what "a region" constitutes in both how to make the region and of what material the region is made. There are no examples given as to what the region might be.

Claim Rejections - 35 USC § 102

- 6) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

- 7) Claims 1 – 11 and 15 – 16 are rejected under 35 U.S.C. 102(e) as being anticipated by

Yamada et al. (USPAT 5621837, Yamada).

As best the examiner can ascertain Yamada reads on all aspects of the claimed invention. Yamada discloses in figure 10 a semiconductor light receiving element (38) having a light absorbing layer and being projected onto a plain wherein the element is to be mounted.

Conclusion

- 8) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tabuchi, Suzuki, Lauterbach et al., Helmut et al., Tabuchi (JP) and Koichi all disclose a light receiving element.
